## RECONSTRUCTION OF THE HOPITAL PEDIATRIQUE DE LA QUARANTAINE

*Actual State of the Site*

## PRESENTATION

**ASSAMEH Birth & Beyond** is a non-profit organization established in 2014 that aims for the rehabilitation of the Pediatric services in the Lebanese hospitals.

The first rehabilitation center, the “Hôpital Pédiatrique de la Quarantaine” opened in 2016. It includes a neonatal Intensive Care (IC) unit comprising 16 incubators, an Intensive Care unit of 4 pediatric beds, as well as 12 twin bed rooms, equipped for general pediatric care.

The pediatric service of this hospital cares for around 1000 patients yearly; children from different nationalities and different social backgrounds. Hundreds of little lives are saved, in particular those affected by extremely rare diseases (such as: meningo-encephalitis, severe anemia due to deficiencies in G6PD, etc.).

It is the only hospital willing to care for babies and children without proper documents. So far 32 children have been admitted including 8 babies abandoned in trash bins. The hospital also cares for young patients referred by other NGOs in charge of abandoned children.

The hospital is the only institution recognized by the Ministry of Health as a day hospital for metabolic diseases. It has also signed academic conventions with two universities in Beirut in order to ensure the training and the permanent attendance of medical staff.

The High Refugees Commission of the United Nations in Beirut has qualified the hospital as ‘**a life-saving NGO**’ whereas the UNICEF confirmed its leading role among all the public hospitals in the area.

**All was going GREAT, till the 4th of August 2020 when the hospital was destroyed.**

Fortunately, babies under neonatal care have been protected by their incubators and were, within three hours, transferred to peripheral hospitals in a specialized neonatal ambulance.

**Five years of hard work disappeared in a wink.**

This is the reason why the “Rotary Club de Beyrouth” has decided to support the NGO “ASSAMEH - Birth & Beyond” and wishes to contribute to the rehabilitation of the “Hôpital Pédiatrique de la Quarantaine”.

The support of private donors is a need. Any kind of help shall be greatly welcomed.

## THE NEEDS - BUDGET

You will find hereunder the list of equipment needed to equip the obstetric unit of the “Hôpital Pédiatrique de la Quarantaine”.

Description	Budget	
	\$	€
<b><u>Basic Equipments:</u></b> Delivery Beds Qty = 4 Electric Beds Qty = 20 Patients Stretchers Qty = 1 Fetal monitors Qty = 4 Vital signs monitors Qty = 4 Defibrillator Qty = 1 Syringe pumps Qty = 10 Infusion pumps Qty = 10 Resuscitators Qty = 2 Non Invasive Pacing Qty = 4	\$ 230.000	
<b><u>Foetal surgery Equipments:</u></b> Miniature telescope Congenital Diaphragmatic Hernia- In Vitro Insertion and Removal Anterior plasma- Curved scope Posterior placenta- straight Cord occlusion Amniotic bands Fetal Cystoscopy Bipolar Accessories		Euro 36.755
